PROJECTS

Super Market Management system

Angular, Spring Boot, and MySQL

- My final year project, which utilized Angular, Spring Boot, and MySQL. This distributed supermarket management system is full-featured. You can view that in my GitHub account.

  https://github.com/Hasshan-cmd/Supermarket-project-pro-

Gobuyz POS Management and Inventory System

Laravel, Vue.js, and MySQL

- Allows user to control inventory, sales, purchases, customers, invoices, payment requests, and more. User will be able to Purchases and Sales from anywhere at any time thanks to it.

  https://github.com/Hasshan-cmd/gobuyz

Ecommerce website for VL Fashion

Ecwid

- This ecommerce website will feature a user friendly and secure shopping cart system, allowing customers to easily add and remove items from their cart. The website should also feature a shopping cart and checkout system. The website should also have a customer account system for customers to sign up and manage their orders.
